

Viewing Student Notes and Journal

As a teacher, you want to view the students' activity in books they've read. This includes highlighting, annotations, and sticky notes.

Once you are logged in, click on Library and then click on Search.

Find the book you want to view annotations and notes for and open the book.

Once the book is opened, click on the  icon on the bottom of the screen. (This will open the side bar (right side of screen))

Click the  icon to view the students who are assigned to this book. You can select each student to view their notes, highlights, journal, etc.
